

FLEXO

The Flexo defines a new smart lock league for exclusive furniture made of wood and steel.

Retro-Fit

The Retro-Fit installation allows easy and almost tool-free replacement of the existing locks. Fast and cost-effective.

Flush-Fit

The Flexo can be recessed into a furniture front and screwed in place with the Flexo.Ring. The lock stands out discreetly from the front.

Flexibility

The Flexo can be used with all BURG steel cams. Assembly does not differ from purely mechanical solutions.

Battery drawer

The batteries can be changed from the outside in both installation situations without having to unlock the lock.

Flexible locking options

Whether one-, two- or three-point locking - with the Flexo, the most diverse installation options can be realized, so that both drawers and double doors can be locked in the same way.

BURG®

FLEXO

reddot winner 2023

Award winning design

The Reddot Award is one of the most prestigious awards for outstanding product design worldwide. It is a special honor for us to receive this award for the Flexo. The clear and minimalist design gives it a timeless elegance that fits perfectly into any environment.

Flexo.Code

The Flexo.Code impresses with intuitive operation and its ergonomic rotary knob. The user can choose from 999,999 codes.

The innovative design lock - Made in Germany - enables the secure storage of personal items in offices, schools and sports facilities.

Flexo.RFID

The Flexo.RFID (Radio Frequency Identification) was developed for the leading standards (MIFARE® Classic 1K and MIFARE® Desfire EV II). In most cases, existing RFID media can be used with the occupancy identification deactivated, because these are only read, not written.

* Both products are available in both installation variants!
